Subject: DRDO proposed M. Tech. program in (Defence Technology) in collaboration with AICTE

Dear Sir/Madam,

Directorate of Futuristic Technology Management (DFTM) Government of India, Ministry of Defence, Defence Research & Development Organization (DRDO), New Delhi, in collaboration with All India Council for Technical Education (AICTE) has decided to start a regular M. Tech. Program in Defence Technology. The main objective is to create interest among young aspiring engineering students for pursuing their professional career in research, technology and product development related to defence and security.

DRDO, Indian industries and armed forces are engaged and immensely contributing together for the development of defence technologies and production / maintenance of defence systems. For these a lot of manpower is engaged in different areas related to defence technologies and there is always a deficiency of educated / trained manpower in these areas. The education of young enthusiastic students in defence related subjects will definitely be beneficial for developing a large skilled human resource base. The trained and talented HR would enable the faster growth of the defence sector and achieve faster self-reliance in defence and security of the nation leading to **Atmanirbhar Bharat**.

DRDO in collaboration with AICTE has launched M.Tech. in defence technology from the academic year 2021-22 and approval to the selected institutions/Universities for this program has been accorded by AICTE. However, this program also needs expeditious approval/affiliation of respective university hence this request letter is being issued for needful action.

The details about the M.Tech. Defence Technology is available on the following link:
